

NOČNE LEPOTE NA KANINU – 7.8.2017

Doživite veseloigro na nočnem Kaninu

V ponedeljek zvečer, 7. avgusta 2017, ob 20²⁰ se bo na nebu dogajala veseloigra: Luna bo delno zašla v Zemljino senco in nastal bo delni Lunin mrk. Te predstave ne smete zamuditi. Vse se bo dogajalo nizko na jugovzhodnem obzorju, zato gremo v prvo vrsto večernega amfiteatra na zgornjo postajo kaninske žičnice, na 2200 metrov nad morjem. A to ni vse! Tedaj bodo na nebu še planet Saturn pa Jupiter in še oddaljene galaksije in množica zvezd.

Delni Lunin mrk, Saturn, Jupiter in nekaj svetlejših zvezdnih gruč in planetarnih meglic si bomo ogledali s časovnim strojem (teleskopom), ki nas po popeljal tja do 100 milijonov let daleč v preteklost ... Gledalce bomo tudi popeljali med značilna ozvezdja poletnega neba.

Če imate kakršenkoli daljnogled, ga vzemite s seboj, da bo opazovanje mrka bolj doživeto, in ne pozabite fotoaparata.

Predstava se bo začela z uvodom ob 19^h, končala pa ob 22^h.

ODHOD Z KROŽNOKABINSKO ŽIČNICO NA 2200m: 17:45 (dobimo na postaji A)

MINIMALNO ŠT. OSEB: 35

MAKSIMALNO ŠT. OSEB: 50

PRIHOD V DOLINO: okvirno ob 23:00

CENA: 37 eur/ osebo

CENA VKLJUČUJE: povratna vozovnica z gondolo, opazovanje ozvezdja s teleskopom, predstavitev in vodenje (g. Boris Kham, prof. fizike), DDV in organizacija.

PRIJAVE DO 5.8. NA: marketing@kanin.si. V kolikor bo prijav premalo, dogodek odpovemo.

V primeru slabega vremena, se dogodek prestavi na 10.8.2017 (takrat delnega luninega mrka ne bo). Ob prijavi zaračunamo 10 eur akontacije, ki se v primeru odpovedi na lastno željo, ne vrača. Priporočamo športno – toplo obleko in obutev.

Restavracija Prestreljenik bo odprta za naročilo osvežilne pijače.

BEAUTY OF THE NIGHT SKY ON KANIN - 7.8.2017

Experience an exciting drama on Kanin by night

An exciting drama will unfold in the sky at 20²⁰ on Monday, 7 August 2017. A portion of the Moon will enter the Earth's shadow and a partial lunar eclipse will occur. You must not miss this show. The event will take place low above the south-eastern horizon, so we will take the front row of the evening amphitheatre, situated at the upper station of the Kanin cable car 2200 m above sea level. But there will be more. Saturn, Jupiter, remote galaxies and a multitude of stars will be in the sky then. We will watch the partial lunar eclipse, Saturn, Jupiter and some easily visible star clusters and planetary nebulae through a telescope – a time machine which will take us up to 100 million years back into the past. The viewers will also look at the typical constellations of the summer sky.

If you have any kind of binoculars, bring them along and make your experience of the eclipse even more enjoyable. And do not forget to take your photographic camera with you.

The show will start with an introduction at 19⁰⁰ and end at 22⁰⁰.

DEPARTURE with cable car on 2200m: 17:45 (we meet at station A)

MIN NUMBER OF PARTICIPANTS: 35

MAX NUMBER OF PARTICIPANTS: 50

ARRIVAL TO THE VALLEY: around 11 p.m.

PRICE: 37 eur/ person

PRICE INCLUDES: a return ticket for cable car, observation with a telescope, presentation and guiding (Mr. Boris Kham, prof. physics), taxes and organization.

WE TAKE RESERVATIONS TILL 5.8.: marketing@kanin.si. If there won't be enough participants we will cancel the event. In case of bad weather, the event will be postponed to 10.8.2017 (without partial lunar eclipse). With reservation we charge 10 eur advance payment, which is not refunded in case of cancellation at your own request. We recommend sport – warm clothes and shoes.

Restaurant Prestreljenik will be open for drinks.

Your host:

Boris Kham, prof. physics
